PROXY

**ENDPOINT A** 

REGISTER CANCEL INVITE 200 OK INVITE ACK BYE 303 Figure 3 Basic SIP operation with a proxy CANCEL REGISTER INVITE 200 OK ĄÇ BYE INVITE > 301 Endpoint A starts a call to Endpoint B. Its replied to with a 200 OK indicating success. An error response indicates failure & the call stops. The ACK finishes the Endpoint B starts to make a call to Endpoint A but decides to stop sb issues a CANCEL. Either Endpoint can terminate a call with a BYE message. Endpoint B tells its IP address to Endpoint A. Request Cancelling Registration Tear-down Call Setup call setup.
